District News

Mr. and Mrs. Bill Scott and Jackie left on Saturday last for a three-week holiday to the coast to visit friends and relatives.

Mr. and Mrs. Geo. Duffy and family of Jones Valley, Mr. and Mrs. Lester Chiswell and girls, of Central, spent Sunday at the home of Mr. and Mrs. G. A. Chiswell, Central. Mr. and Mrs. Chas. Cleveland and family are making their home with Mr. F. F. Tracey for the summer. Mr. and Mrs. Frank Seaville and family spent Sunday at Mr. and Mrs. Stuh's house.

Mr. Joe Johnson has taken up duties at the R. J. Jolin farm for the summer.

Mr. Fred Johnston Jr., is stepping out these days. Wonder who the lucky girl is? Watch out, Freddie, there's danger around the corner. Mr. and Mrs. Ernest Draper and Walter spent Sunday at the home of Mr. and Mrs. O. L. Norris of Chigwell.

Wedding Bells were ringing in our district, but no one heard the bells till too late.

Mr. Stanley Palmer and Miss Esther Leech, were the contracting parties. The district wishes them a long and happy wedded life.

Miss Elma Schell returned home Thursday, where she will spend the Easter holidays with friends and relatives.

The two "Jacks" are trying to see who can make the wedding bells ring first. Good luck boys.

Eighty friends gathered at the home of Mr. and Mrs. Ernest Draper on Friday night last, for a card party and dance given at their home. The upstairs was filled with card tables for those that wanted to play cards, and dancing was carried on downstairs.

Mr. Cecil Hadd on the accordion, Joe Johnson, Banjo and Ira Johnson, with the violin supplied the music.

Prizes going to Mrs. F. J. Johnson for Ladies' first, Mr. F. Hockenbush, gent's first. Consolation prizes to Mr. Ernest Draper and Mr. P. Kraft. At midnight a sumptuous supper was served, then dancing was resumed till the "wee sma' hours." Everyone departing declared they had a grand and glorious time. Here's hoping there will be another before spring work.

MEADOWBROOK

The Meadowbrook Ladies' Aid, together with Mrs. Wm. Kinley, and Mr. Sims desire to thank all who took part in the program given at Meadowbrook United Church on Wednesday, the 21st inst., not only for the help but also for the good will which the help was given. In this connection also we would not forget the auctioneer of the evening, Mr. Wm. Kinley. He has the makings, owing to severe colds, several of the people in the program brought frogs with them (in their throats) and part of our music had to be omitted on account of the above mentioned colds and the fact that bad roads kept some performers away. However it is our hope that all had a pleasant evening. The net proceeds amounted to \$19.20.

Special meetings will be conducted in the school at 3 p.m., commencing Sunday, April 1st. Speaker, Miss A. Richardson, of Edmonton, Alta.

MUSIC TEACHERS AND PUPILS

The Toronto Conservatory of Music Midsummer Recital for 1934 will be held throughout the Dominion from June 1st to July 1st. Applications and fees of Canadian-born students from British Columbia, Saskatchewan, Manitoba and North Western Ontario (last five years) must reach the Conservatory not later than MAY 15, 1934.

Application forms and Annual Syllabus containing full particulars will be mailed on request.

RIMBEY PASSES

GRAZING BYLAW

Rimby, April 3.—The municipal council of Rimby passed the grazing bylaw providing for the free grazing of stock at the rate of 75 head per quarter section of land for resident land owners and prohibiting stock from outside the municipal district. Two new pound districts were recommended.

The wild lands tax on Hudson's Bay and Canadian Pacific Railway holdings is to be removed following the passage of legislation to that effect.

The reeve, W. F. Jersey, and secretary, A. A. Samuelson, were delegated to again visit upon the provincial premier in regard to the Bentley-Rimby Gravelled highway, so that as the decision of local funds is in the hands of the department.

CONSERVATIVE CONVENTION

The one day convention of the Conservative Party of Alberta to be held in the MacDonald Hotel, Edmonton is shaping into an enthusiastic rally. Conservatives from all parts of the Province will be in attendance to lay future plans for the party to promote advanced, progressive, sane and practical legislation for the common good.

All Conservatives are invited and will have full privileges of presenting resolutions, speaking to resolutions and generally taking part in all discussions. Delegates attending from each Provincial riding will choose two of their number for each member they are entitled to return to the legislature, whose duty it shall be to record the wishes of the majority of the delegates from their respective constituencies on all votes taken. In this way every riding will have equitable voting power regardless of the number of representatives in attendance. Women will have equal status with men in every respect and it is hoped that a good percentage of the delegates will be women.

Many delegates are coming to Edmonton in parties by car. Special hotel rates will be available.

One of the most important tasks of the Convention will be to deal with a large number of resolutions. Conservatives of every constituency have been invited to submit resolutions and a large number have been received. These are being consolidated by a committee that will have them carefully arranged so that they may be submitted to the Convention in an orderly way. Further resolutions may be submitted in writing during the day of the Convention.

A proposed agenda has been drawn up and will be submitted to the Convention as soon as it meets. This provides that during morning there will be two main addresses, the presidential address by Mr. H. R. Milner, K.C., President of the Provincial Conservative Association and a speech by Mr. D. M. Duggan, M.L.A., leader of the Conservative party of the province. The Convention will also select its own officers for the day, Chairman, Vice-Chairman and its committees on credentials on organization and on resolutions.

The afternoon will be devoted to receiving and discussing reports from the committees, most important of which will be the reports of the committees on organization and on resolutions, and to the election of officers.

Three radio broadcasts have been arranged in connection with the Convention. The Young Men's Conservative Association of Edmonton has arranged for two ten minute broadcasts on Tuesday and Thursday, April 3rd and 5th from 6:30 to 6:45 over station CJOA of Edmonton.

Mr. Duggan, M.L.A., of Edmonton and Mr. Hugh Partridge M.L.A., of Calgary have accepted invitations to speak on these occasions. They will be introduced by Mr. D. M. Ramsey, President of the Young Conservatives of Edmonton. The Young Conservatives of Calgary have arranged for a hook up over station CFCN of Calgary so that both speeches may go on over the two stations.

On the evening of the Convention there will be a banquet in the MacDonald Hotel. Mr. Duggan, the leader of the Provincial party will review the work of the Convention in a speech that will be broadcast from 8:30-9:00 p.m.

On Friday evening, April 6th there will be a Conservative dance in Edmonton at the Rivoli at which a large number of the delegates will be present.

THE CHURCH OF ENGLAND IN CANADA

St. Cyprian's Church, Lacombe
Rector: The Rev. T. H. Chapman
Telephone 165
Organist: Miss Kathleen C. Walters
A. T. C. M.

April 5th, 11:30 a.m. after Easter 10:00 a.m. Sunday School.
11:00 a.m. Morning Prayer and Sermon.
7:30 p.m. Evening Prayer and Sermon.

So many voluntary expressions of appreciation of the Easter music have been made that it has been decided to repeat at least some of it on the coming Sunday. If you heard it last Sunday, come and enjoy it even more next Sunday; and if for any reason you missed it last Sunday, be sure not to miss this second opportunity of hearing it.

TO BE KEPT IN MIND: There is every probability of a Vocational Conference for the "Young Girls" early in June. We may be able to let you know definitely of this next week.

Plans are being made for a suitable commemoration of the 40th anniversary of the formal establishment of this Parish, the date of which falls on Wednesday, May 13th. It is not too early to begin thinking of our Annual Diocesan Summer School. And what about Confirmation.

C.G.I.T. MEETING
The importance of both individual work and united effort was stressed in a talk by Mrs. A. Allwinckle, to the several groups of P.G.I.T. girls who met with the W.M.S. in the Annual Diocesan Summer School.

AT AVALON

An imp of a colleen, as fiery, gray and rough a lass as has ever tumbled her proud head... and a big, strapping fellow with a heart of gold and a smile in his eye. They are Janis Cagney and Warner Baxter in "Paddy, the Next Best Thing," the new Fox romance coming to this Theatre on Thursday, Friday and Saturday of this week. And what is more natural for these two than to fall in love... and not know it... simply because the girl is determined that she is going to hate the ground he walks on.

"Paddy, the Next Best Thing," brings together again the joyous stars of "Daddy Long Legs." If you remember that one, you'll realize the treat that awaits you. Harry Laemmle directed the production, and that fact guarantees photographic charm. Edwin Burke, screen creator of "Bad Girl" did similar service for this one.

The supporting cast is without a doubt one of the most notable ever gathered for a motion picture. It is headed by Walter Connolly and includes Harve Stephens, Margaret Lindsay, Mary McCormack, Joseph M. Kerrigan, Fiske O'Hara, Claire McDowell, Merle Tottenham, Roger Imhof and Trevor Bland.

Coming: Double Feature, "The Torch Singer," and Buck Jones in "Border Law." April 12, 13 and 14. "King Henry VIII," claimed to be the finest picture of the year. April 19, 20 and 21.

Coming
"HERE COMES CHARLEY!"
A three-act Comedy-Drama, entitled "Here Comes Charley," will be presented in the Avalon Theatre on Wednesday, April 11th, 1934, under the auspices of the Ladies Degree Team of the Modern Woodmen of America. Tickets: Adults - 35c. Children 25c.

DEATH OF MRS. J. SHARP
Mrs. James Sharp, one of Lacombe's most highly esteemed citizens, died at her home here on Tuesday after a short illness. She was in her 76th year. The funeral was held at the Lacombe United Church, Rev. R. B. Layton, being held in the United Church. There was a very large attendance of friends of the family and many beautiful floral tributes were received. Deceased leaves to mourn, one daughter, Mrs. J. H. Gosnell, on the farm, who have the sympathy of their many friends.

VEREGIN ON DRUNK CHARGE
Nelson, B.C., April 2.—Peter Vergin, leader of the Christian Community of Universal Brotherhood, and two other Doukhobors, were at liberty on bail on Sunday night following their arrest on charges of being intoxicated in a public place. Vergin himself was receiving treatment in hospital.

The arrests followed trouble in a local beer parlor Saturday night in which Doukhobors and some other customers came to blows. Considerable damage was done to beer parlor furniture.

BORN
At Lacombe Hospital on Tuesday, April 3, 1934 at 2:30 p.m., Ruby Belknap a son.

Don't forget that the Public Lecture of Major C. H. Douglas in which the subject of Calgary will be broadcast from there at 8 p.m. on Saturday, April 7th.

The Bentley cheese factory is now handling 800 lbs. of milk a day which will be largely increased soon. G. Brown, of Fairview, is preparing to build a house and barn during the summer. House 1 28 x 19, 14 ft. porch, cologne roof.

Mr. and Mrs. J. W. Johnston returned from Buffalo Lake Friday where they spent last week visiting with friends.

J. L. Walters has located himself on a ranch fifty miles S. E. of Lacombe, down the Red Deer river. J. Proudfoot has lost a mare through having the glanders and expects to lose another with the same disease. It is hard luck, John.

Mr. and Mrs. Ray Bagley have taken up their residence in Will Shannon's new house and their son is doing fine. Ray is going to make him a broncho twister.

S. Watt has moved his portable saw mill from Butcher & Sons Ranch to Blackfield. While there he cut 100,000 feet of choice lumber which will be used for new houses, barns and other buildings to beautify our country.

Following is the list reported from Regina of successful candidates from Lacombe at the recent departmental examinations for standards 6 and 7.

Standard 7—Maggie Daykin, Fern Puffer, Kathleen Rison, Sophia Rose. Standard 6 on standard 7 examinations—Claude Martin.

Standard 6—Harold Clark, Nellie Mooney, George Mooney, Madge Talbot, Edith Wells.

Adams—At Lacombe: to Mr. and Mrs. John Adams, a daughter.

Glanville—At Pleasant Valley; to Mr. and Mrs. Edwin Glanville, a daughter.

Dudley Manley, a Pleasant Valley settler, ten miles east of Lacombe, committed suicide Wednesday. He placed the muzzle of a shot gun to his right temple and pulled the trigger.

Harry Brownlow and Albert Anderson have launched a new boat on Gull Lake.

Philo Slaughter has graduated in the railroad grading business and has returned to his rural occupations at Bentley.

Mr. C. Gaigen is investing in cattle. He says they are the main thing in Alberta where the grass is cheap.

Joe Jamieson has gone to the Wilderness of Sit, twenty miles beyond Coquit to assist his brother in making hay.

Art School in Rockies

A. C. Leighton, R.B.A., president of the Government Art College at Calgary, who will again this year hold his summer art school for selected students from the province of Alberta at the Kananaskis Dike Ranch near Banff. Mr. Leighton, who is a grand nephew of the late Lord Leighton, president of the British Academy from 1878 to 1896, has been painting for years at Banff and through the Canadian Rockies. He is also head of the Institute of Technology and Art in connection with the University of Alberta. Some years ago through his paintings of the old windmills of Kent and Sussex he was largely responsible for the movement to retain and restore these historic landmarks. The Kananaskis Dike Ranch operated by Mrs. Bill Brewster, is well known throughout Canada and the United States and is situated in the beautiful valley of the Bow River, and is surrounded by the most magnificent of Canadian Rocky Mountain scenery.

KEEN COMPETITION AT CALGARY BULL SALE

Cattle champions were crowned at Victoria Park on Tuesday. It was a hard day on both exhibitors and judges for the margin between the champions and the runners-up were in many cases extremely small, but the satisfaction of winning in the face of stiff competition fully compensated those who took their cattle into the ring.

In no instance was this satisfaction more apparent than in the ever popular baby beef competitions. Margaret E. Wilson, a comely lass from Sedgewick, won the supreme honor in this division after a long contest with two or three other contenders. Not until the final moment were the judges fully satisfied that her smooth Shorthorn entry was entitled to the highest rank, but when they made their decision a storm of applause from the packed gallery showed it met with the approval of the lookers on. The champion baby beef animal later sold to T. Eaton Company for 15c. per pound. It weighed 900 pounds.

Margaret's chief competitor was Rees Pearson, Shepard, showing an attractive Hereford calf.

The Sedgewick girl had first won the class for baby beef showing Shorthorn characteristics. Second in this class was Stanley Young, Acme; third, William Baird, Olds; fourth, Bart J. Boake, Acme and fifth, John Simpson, Innisfail. There were 12 entries.

For animals showing Hereford characteristics, Rees Pearson took first; Frances Roper, Lacombe, second; Eugene Duckert, Lacombe, third; Eugene Havens, Crossfield, fourth; Belle Hudson, Kathryn, fifth and James Hole, Aldridge, sixth.

For black animals in the baby beef section Daisy Young, Acme was first; Jeanne O. Henderson, Lacombe, second; Thelma Anderson, Camrose, third; Berneice Black, Camrose, fourth; and Muriel K. Pearce, Lacombe, fifth.

The winners of these classes were also the recipients of special prizes donated by the Dominion Shorthorn Breeders' Association, the Alberta Hereford Breeders' Assn., the Alberta Aberdeen Angus Association and the Leithridge Union and Alexandra hotels, Calgary.

Dr. H. G. Berry, Okotoks, exhibited the champion Aberdeen Angus bull, in station Grady, and the veteran breeder, Thomas Henderson, of Lacombe, reserve champion, Prince Marshall 51st.

Star Plover is said to fit many makes of flow, 14 inch at \$2.80 at Morrison and Johnston, Ltd.

Rev. R. B. Layton leaves next week to attend a board meeting of the Church at Toronto as representative for Alberta. He has been asked to speak at a World Missionary Conference in London on April 10th. He will be away for about two weeks. His pupils will be supplied during his absence by Rev. T. B. Davies, B.D., Ponoka and Rev. W. M. Grant, M.A., of Metropolitan Church, Edmonton.

B. Wainberg and Co., Limited, have opened an Egg Grading Station in the building next door to Fraser-Macdonald Agency, and is prepared to buy produce of all kinds. Mr. B. Stein, an experienced produce man, is in charge, and will be pleased to quote prices on anything in his line.

COLDS ARE DANGEROUS

Soothe and relieve them, build up resistance with SCOTT'S EMULSION

WORLD HAPPENINGS BRIEFLY TOLD

British Columbia will consider a minimum wage for domestic help. Hon. George E. Pearson, minister of labor, has announced.

Closing of government houses in the western provinces as a temporary economy move was suggested in the Alberta legislature by D. M. Duggan, Conservative leader.

The Canadian government has not officially recognized the new state of Manchukuo, the prime minister stated in the house of commons in answer to a question by J. A. Bradette (Lib., North Temiskaming).

Appointment of a board of conciliation to deal with a dispute between the Canadian National telegraph and certain employees in the maritime provinces, was announced by Hon. W. A. Gordon, minister of labor.

A meeting under the auspices of the Ukrainian famine relief committee, in Winnipeg was on record as requesting Manitoba government authorities to suppress various orders and organizations supporting Communism.

Traveling medical clinics to treat children in unorganized territory of Manitoba are to be initiated this year in co-operation with the work of the public health nurses, Hon. R. A. Hoy, minister of health, told the Manitoba legislature.

David Kirkwood, Labor member of parliament in Britain, has received 30 or 40 applications from imperial ex-servicemen now living in Canada since he was successful recently in getting a claim by one of them settled by the ministry of pensions.

The advantages or disadvantages to the farmer of hog grading were debated in the agricultural committee of the commons. In every big market in Canada except Montreal the trading in hogs is done on the basis of the grading by official graders.

The heaviest earth shocks ever recorded at Salt Lake City, Utah, rocked cities in north Utah and southern Idaho recently, caused large buildings to sway, cracked the walls of some structures, and also jolted communities in southwestern Wyoming, Nevada and California.

McGill University Benefactor

Montreal Man Leaves Large Sum To Eastern Institution

McGill University will benefit considerably, probably to the extent of more than \$100,000, under the will of the late Dr. John Bowring Lawford, a native of Montreal, who practiced ophthalmic surgery in Hawley street.

The estate has been probated at \$315,000. The McGill medical faculty will get \$5,000 to be expended on a library and museum. Another \$50,000 goes to the London Ophthalmic hospital and \$25,000 to the British National Blind Library.

Ultimate residue is to be divided between McGill and St. Thomas hospital, London.

Put Bootleggers To Work

So many bootleggers have been arrested in Finland as the result of new legislation that special barracks for some of them have been built in the Suikela district of central Finland. It will hold 200. The sentenced bootleggers are to be employed in reclaiming marshy and rocky land. The Finnish government recently issued statistics showing that 128,000 gallons of contraband liquor had been seized in the first 11 months of 1933.

Macbeth is Shakespeare's shortest play.

Swollen Joints

often are a warning that your kidneys have become deranged and need attention. Don't suffer needlessly pain. Take Gil's Pills to obtain relief and ask your kidneys to function properly.

Wider Use For Insulin

Is Used In Mexico For Curing Insanity And Checking Paralysis

Insulin, given to the medical world in 1922 by Drs. Frederick G. Banting and Charles H. Best, of Toronto, a treatment for diabetes, was hailed by a Mexican doctor as having curative powers in cases of insanity and the quality of checking locomotor ataxia.

Dr. Donato Perez Garcia, of the Industrial hospital at Mexico City, announced five persons suffering from progressive paralysis were cured from death through injections of insulin. Two insane persons, he said, had been restored to reason by similar treatments.

Other Mexico City doctors did not fully share Dr. Garcia's optimism, but there was an indication they considered progress had been made.

Dr. Garcia said he had devised means of reaching nerve centres of affected persons with injections of insulin. Thus he claimed to have overcome the chief difficulty in the treatment of such cases.

Gave Huge Banquet

Motor Car Manufacturer Entertained 6500 Guests In London

One of the most impressive features of the last motor-car show in London was a banquet given by a famous manufacturer of cars. The guests numbered 6500 and the tables, if set in line, would have extended to a mile and a half. Preparations for this number called for the services of 120 chefs, 200 assistants, 680 waiters, and 250 musicians provided the music. To satisfy the guests, 6,500 lobsters were consumed, 450 hams, 1,600 chickens, 7,000 mixed fruits, 800 quarts of ice cream, 2,000 lettuce, 8,000 bottles of champagne, Bordeaux and burgundy, and 3,000 bottles of mineral water. Further calculations in connection with this huge banquet showed that the total weight of the provisions and table equipment was between 140 and 150 tons.

Winnipeg Newspaper Union

By Ruth Rogers

An entirely different picture of modern Turkey than can be imagined by many North Americans was conjured up by Dr. Kattani Malouf, a Montrealer who has just returned from a visit to the state of Mustafa Kemal.

The fedora has replaced the fez. Latin characters written from left to right are now used instead of Arabian characters, written from right to left. The name of Allah has been abandoned in the call to the faithful from the mosque and the burqa has been forever, he declared.

Instead of the traditional eastern ruler, Mustafa Kemal is a typical westerner, according to Dr. Malouf. Once he achieved leadership he westernized everything from traffic signals to written or printed script.

Introduced the study of western European languages and ideas. To-day school children are taught in Turkish for the first four years of their course, and during the following three years select the western language they are to study.

Gone too are the reactionaries who rebelled against the new regime. Kemal hanged 26 from lamp-posts in the streets, said Dr. Malouf, and the rest fled or forever held their peace. Gone are the picturesque banditti who infested Turkish roads. Finger pointing and Scottish Yard methods, Dr. Malouf remarked, had driven them out.

Map Built Of Concrete

Possibly the largest relief map in the world exists in Nova Scotia. On the boundary of the two provinces of Nova Scotia and New Brunswick a relief map of Nova Scotia was erected three years ago, and measures 150 feet long and 90 feet high. This relief map is built of concrete, is in generous colors and is illuminated at night by flood lights.

Government measures are reported to be stimulating business in Germany.

A small town is the one where the best horsehide pitcher is envied.

CARBON DIOXIDE

(By Gordon H. Thist, M.A.)

Carbon dioxide is the gas produced whenever carbon or any of the common fuels, all of which contain carbon, burn in oxygen or air. It is also formed in certain processes such as fermentation and the decay of organic matter. Large quantities also escape from volcanoes and geysers in the earth. It is present in the open air to the extent of about three parts in 10,000. This relatively small amount is essential to the life of all plants and hence it indirectly serves to supply us with our food.

One of the essentials of the life process in animals is the slow combination of the oxygen, taken in by the lungs, with the food which has been consumed. This reaction liberates the heat which keeps the body warm. The products of this body combustion, carbon dioxide and water vapor, are exhaled with each breath.

At first thought it would seem that the constant production of this great amount of carbon dioxide must fill the atmosphere with the gas. The fact is, however, that when pure air in the country is analyzed, it is never found to contain more than three or four parts in 10,000. This is because most plants reverse the process which takes place in animals; they take carbon dioxide from the air and give off oxygen.

Carbon dioxide is without color or odor and is about 1.5 times as heavy as air. At ordinary temperature one volume of water dissolves about one volume of gas but under pressure much more will dissolve. A property used in preparing effervescent soft drinks.

It is well known that carbon dioxide escapes through openings in the earth's crust. In a cave near Naples, enough carbon dioxide issues from the cracks in the floor to form a layer from two to three feet deep along the bottom. If a man and a small dog walk through the cave, while the dog quickly becomes unconscious, and soon dies if not rescued, the man, whose head is well above the layer of poisonous gas, feels no bad effects. This cave, because of its fatal effect on dogs, is called "rotto dei cani," which means the "cave of the dog."

Fedora Replaces Fez

Only One Of Many Changes In Modern Turkey

An entirely different picture of modern Turkey than can be imagined by many North Americans was conjured up by Dr. Kattani Malouf, a Montrealer who has just returned from a visit to the state of Mustafa Kemal.

The fedora has replaced the fez. Latin characters written from left to right are now used instead of Arabian characters, written from right to left. The name of Allah has been abandoned in the call to the faithful from the mosque and the burqa has been forever, he declared.

Instead of the traditional eastern ruler, Mustafa Kemal is a typical westerner, according to Dr. Malouf. Once he achieved leadership he westernized everything from traffic signals to written or printed script.

Introduced the study of western European languages and ideas. To-day school children are taught in Turkish for the first four years of their course, and during the following three years select the western language they are to study.

Gone too are the reactionaries who rebelled against the new regime. Kemal hanged 26 from lamp-posts in the streets, said Dr. Malouf, and the rest fled or forever held their peace. Gone are the picturesque banditti who infested Turkish roads. Finger pointing and Scottish Yard methods, Dr. Malouf remarked, had driven them out.

Proves Old Saying True

Eighty-Six Octogenarians Married In England Last Year

The old saw that proclaims "It is never too late to marry" was obeyed by 86 octogenarians and 428 septuagenarians in England and Wales in 1933.

According to the registrar-general's statistical review for the year, 81 of the octogenarians were widowers. Of the septuagenarians marrying during the year, 351 were men.

Only one man of more than 90 years took the plunge and he was a widower.

Louis L. Lang, President, Galt, Ont.

Frank W. Reineck, Chief Farm Manager

J. F. Weston, Vice-President

T. O. F. Herzer, General Manager

Colonization Finance Corporation

Reviewed At Annual Conference

Farm managers of the Colonization Finance Corporation and Western managers and inspectors of member companies were present in Winnipeg recently for their annual conference on practical problems of agriculture at the present time. The supervising staff of the Canada Colonization Association was also in attendance.

At the meetings, a paper was read by D. Howard Doane of St. Louis, Mo., on the question of rural appraisal, and various problems of farm management were discussed, among them the following: Moisture conservation and soil drifting in areas subject to drought, problems of control and cropping methods to meet the grasshopper situation, methods for controlling cool grass, general problems in the control of wild oats, ways of securing necessary farm power, land utilization involving the better use of waste land, rotation of crops, and the use of fertilizers.

The beginning of an organized farm management program, such as the Colonization Finance Corporation has been carrying out for the past four years, dates from a meeting of the Dominion Mortgage and Investment Association held in Montreal, March 28, 1927. Two years of land settlement on the part of the Canadian Colonization Association, a subsidiary of the Canadian Pacific Railway, had clearly demonstrated that more extensive supervision of new settlers was required. This was a greater burden than this organization or individual lending companies could bear, and it was apparent that this could best be done by point effort.

During the first year, the farm management department, having only 20,012 acres in the province of Manitoba under the supervision of Mr. W. J. McLeod and K. McLean, assistant managers, was elected to the presidency of the Colonization Finance Corporation upon Mr. Bowman's death in 1932 and was recently re-elected. J. P. Weston, managing director of the Imperial Life Assurance Company, is vice-president, and T. O. F. Herzer of Winnipeg, Man., has served as general manager of the organization since its inception.

Members of the executive committee include W. Hastie, Toronto, assistant general manager of the Canada Life Assurance Company; S. E. Cork, Confederation Life Assurance Co.; A. E. Pequegnat, assistant general manager of the Mutual Life Assurance Company; and J. C. Brockbridge, Toronto, general superintendent of the National Trust Co.

These familiar with the farming program of the Colonization Finance Corporation understand that it is built on the economical control of weeds and the restoration of soil fertility, often through the use of sweet clover, making possible the keeping of more and better livestock and the lowering of the costs of summerfallow. It is always kept in mind that grain farming is the major project in any system of farming in Western Canada.

Constant and effective effort has been continued by the farm managers to provide an improved feed supply on all farms and to improve the quality of all livestock. The latter has been stressed far more than an attempt to increase livestock through outside purchases, and the inventory shows a large percentage of the equipped farms. A special effort is made to increase very rapidly the hog production on the farms. The aim is to improve the quality and increase the production of hogs to make advantage of marketing opportunities available in the British market under the Ottawa agreement.

By the plan adopted, it is expected that a continuous flow of the right type of hogs, which bring the highest price on the British market, will be stimulated and maintained throughout the year.

The zone managers, who work with the chief farm manager, Mr. Reineck, are located at the following points: R. W. Gowan and C. R. Bradford, assistant managers; George E. Ford, Portage la Prairie, Man.; A. E. Judson, Dauphin, Man.; W. C. Kent, Birtle, Man.; H. J. Siemens, Brandon, Man.; A. J. Clark and M. C. Stern, assistant managers; W. J. McLeod and K. McLean, assistant managers; Mossmoore, Sask.; J. B. Day, Oxbow, Sask.; W. Harkness, Weyburn, Sask.; O. S. Longman, Indian Head, Sask.; H. B. Sommerfeld, Yorkton, Sask.; and W. H. Gowan, Sask.

Louis L. Lang, Galt, Ont., first vice-president of the Mutual Life Assurance Company of Canada, and president of the Canadian Colonization Finance Corporation, was elected to the presidency of the Colonization Finance Corporation upon Mr. Bowman's death in 1932 and was recently re-elected. J. P. Weston, managing director of the Imperial Life Assurance Company, is vice-president, and T. O. F. Herzer of Winnipeg, Man., has served as general manager of the organization since its inception.

Members of the executive committee include W. Hastie, Toronto, assistant general manager of the Canada Life Assurance Company; S. E. Cork, Confederation Life Assurance Co.; A. E. Pequegnat, assistant general manager of the Mutual Life Assurance Company; and J. C. Brockbridge, Toronto, general superintendent of the National Trust Co.

Government Annuities

Increasing In Popularity In Spite Of The Depression

Government annuities are increasing in popularity, and despite, or as a result of the depression, Canadians bought more annuities during the present fiscal year, 1933-34, than in any past year. Hon. W. A. Gordon, minister of labor, told the house of commons the vote for annuities this year is \$85,000, an increase of \$30,500 from last year. Total receipts from the sale during the year have amounted to \$5,030,911.

Jamaica is still feeling the agricultural losses due to the hurricane and storm havoc of last year.

Manx Puzzles Translators

Language Has No Words To Describe Modern Inventions

Numerous puzzles confront even the most expert linguistic experts who have to translate modern English idioms into the Manx language. But this has to be done frequently as all laws enacted in the Isle of Man have to have both English and Manx texts.

The Manx phrase of Keys the lower branch of the Isle of Man legislature, will shortly be asked to bring up to date a bill empowering the Douglas highway board to close the roads for the annual automobile race, one of the most dangerous in the British Isles.

The bill must be prepared in both the old Manx tongue and in English. Its translation can only be undertaken by an expert Manx scholar.

There is no such Manx equivalent for the word "motor," since such a vehicle did not exist when the language was a living one on the island. The word "race" is translated into Manx Gaelic as "Co-hirrey," meaning a "contest" or "striving together."

Many difficulties that face the translator of modern terms into the ancient Manx language. The task is becoming more each year with the admission into the English language of American expressions and the growing decay of Manx.

On some occasions even the expert linguists find it impossible to get the exact Manx equivalent for many English words. When the recent conversion of the Isle of Man stock took place the translator described it for legal purposes in Manx as "the change-over of the loan for war." In Manx this is "easagh (loan) chagges (war) chynnydys (change-over)."

Income tax in Manx is "keesh comeey veeleagh," a tax on yearly gain.

Love's Old Sweet Song

Incredibly Aged Turk Would Woo And Wed Again

Zaro Agha, incredibly aged Turk, asked the government to double his salary as doorman so he could court in proper fashion an attractive 40-year-old woman.

Zaro, 160 years old, gets \$21 a month and wants \$42. He has outlived a succession of wives over a period of 146 years. The exact number he does not remember.

Though he is joyfully enthusiastic over his latest romance, it apparently is but another rose-colored incident in a long line of them.

Canada Gets New Fruit

Cross Between Orange And Grapefruit Has Intriguing Flavor

"Should be the name of up fruit will be changed to a more beautiful name." That is the question bothering certain importers in Montreal at the moment. Meantime, a shipment of 2,500 lbs. specimens of up fruit was landed at Halifax from British Honduras and Jamaica, aboard the Canadian National ship Lady Somers and Cathcart and rushed to the Montreal market. It is a cross between an orange and a grapefruit, importers explain. They predict a great future for it on the Canadian market, because of its especially intriguing flavor.

New All-Time Record

Montreal Aviator Mastered Art Of Gliding In 105 Minutes

A new all-time record for motorless aircraft was recently established at Montreal when Wilson Hammond, 19, made a complete solo flight in a glider after one hour and 45 minutes of dual instruction recently.

Hammond took off from an airport, circled over several times, made a perfect three point landing, and then taxied to the hangar. Seven hours of dual instruction is usually required before a student is allowed to make a solo flight. His instructor was Githen Edwards, youngest commercial pilot in Canada.

Generates Own Light

Balmy Chinoooks that cut down heating bills this winter entirely eliminated lighting expenses for R. H. Bowne of Windsor Park, Alberta.

From Mr. Bowne's back yard a wind-driven lighting plant made from the chassis of an automobile provides enough current to keep two storage batteries charged for home lighting.

A four-legged sea creature and more than 2,000 fossilized specimens of fish, found in Greenland, have been landed in Copenhagen by Dr. Laue Koch's expedition.

They may get away from jail or their wives but no man ever got away from himself.

A crab more than 11 feet long was caught recently off the coast of Japan.

EDWARDSON

EDWARDSON BRAND CORN SYRUP

A pure, wholesome, and economical table syrup. Children love its delicious flavor.

THE CANADA STARCH CO. LIMITED, MONTREAL.

OCCASIONAL WIFE

EDNA BOB WEBSTER
Author of "Jorista," "Lipstick Girl," etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avie Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Watson, his former roommate with whom he has quarrelled. At a party at an exclusive club Peter entertains Camilla's guests with impersonations. When the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avie and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Bowman and Weeks, an advertising agency, where Camilla has submitted some of her work, send for her and tell her they have a new account which requires unusual treatment of juvenile art. To Camilla's surprise she learns that the account is that of her foster father's company, which has decided on an extensive campaign to bolster up lagging business. After a conference with Mr. Bowman, Camilla decides to attempt the work. The critics were enthusiastic about her work and Mr. Weeks offers her a salary of \$50.00 a week to start and a prospect of having it doubled. She goes to keep a dinner engagement with Peter. She tells Peter of her good fortune in securing employment. Mrs. Hoyt is also informed that Camilla has obtained work and is going to leave the Hoyt household. Avie Werth rents a studio on the same floor as Peter, and invites him to have lunch there.

(Now Go On With The Story)

CHAPTER XXXV

After all that was the harm in accepting Avie's friendly hospitality. She had managed it so that Peter would seem absurd to refuse. His only concern was for time, and he had been about to run to the corner lunch counter for something to eat, anyway. "On one condition," he warned her, severely. "Oh, I know what you are going to say, old ambitious—that I don't encourage you to linger after the last biscuit is vanished. All right, but you know it really isn't polite for a guest to eat and run away. Only a generous hostess would understand the urgency of the situation." "And you will be generous, of course." "You know it, because I am anxious as you are for nothing to interfere with your exhibit entry." "You can't be one-half as anxious," he scoffed, not taking her seriously in the least. "Oh, can't I?" she said gently. "Well, that's just why I am looking

HOW TO FIND OUT IF YOU HAVE ACID STOMACH

HERE ARE THE SIGNS:

Nervousness Frequent Headaches
Indigestion Feeling of Weakness
Loss of Appetite Mouth Acidity
Nausea Sour Stomach
Auto-intoxication

WHAT TO DO FOR IT:

TAKE—2 teaspoons of Phillips' Milk of Magnesia in a glass of water every morning when you get up. Take another teaspoon 30 minutes after eating. And another before you go to bed. OR—Take the new Phillips' Milk of Magnesia Tablets—one tablet for each meal and at bedtime.

If you have Acid Stomach, don't worry about it. Follow the simple directions given above. This small dosage of Phillips' Milk of Magnesia acts at once to neutralize the acids that cause headache, stomach pains and other distress. Try it. You'll feel like a new person.

But—be careful you get genuine Phillips' Milk of Magnesia, or Phillips' Milk of Magnesia Tablets when you buy—25c and 50c sizes.

ALSO IN TABLET FORM

Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

MADE IN CANADA

Phillips' Milk of Magnesia

W. N. U. 2038

made me forget that times wait for no man and opportunity flies."

"Your quotations are all jumbled," Avie laughed.

"The food has gone to my head," he apologized. "But, seriously, that's the first decent meal I've had for a week. I hope I didn't eat the glut-ton."

Avie was clever. She did not repeat the same strategy too often. Sometimes it was just a steaming cup of coffee, handed in to him at the right moment without personal interruption, or an lead drink in the evening when he had stopped work for the day, followed by a friendly goodnight.

For contrast, there were several days at a time when her door was closed and her rooms devoid of human sounds, while she filled social engagements or remained anxiously at home. But she was never absent from the studio long enough to allow Peter to become aware of loneliness to merge into forgetfulness. She dabbled with her painting, entertained or just amused herself, striving for patience and a friendly indifference toward Peter at the same time that she displayed an intense interest in his work and progress.

So subtle was the effect upon Peter that he soon forgot his aversion to an importunate neighbor, dropped his antagonism toward the Avie Werth of the past whom he concluded he had judged too severely, and became so accustomed to her friendly concern for him that he relaxed into his pleasant comfort as he sank wearily and gratefully into one of her cushioned chairs and sipped a refreshing drink at the end of an arduous day.

(To Be Continued)

Language Of "Dumb" Animals

Naturalists Tell Us Differing Sounds Are Really Understood

Without any doubt animals communicate with one another in the most human manner.

Naturalists relate how animal mothers make differing sounds to their young which tell them exactly what they must do or must not do in order to grow up and learn to take care of themselves. A whinny or a note of alarm from an animal will apprise the youngsters of freedom to play, or of danger impending. Another note will signify when they have been found in a deserted cave. A book, "How Animals Talk," gives some amazing instances of animal methods of communications. When flocks of ducks are in flight there are always scouts on the outer edge and ahead, watching for birds of prey. A cry from a scout will bring the whole flock to ground and to cover. What is more, those birds know even from a distance where a predatory bird has recently eaten, and will pass on knowing they will not be molested if it is not hungry. They know, too, when a man is carrying a gun and when he is carrying a cane, even if he carries the cane in the manner of carrying a gun. They will wheel away from the man with a gun, but take no alarm at the man with a cane.

Truly, animals are not such "dumb" creatures as we think—St. Thomas Times-Journal.

Old Magazine Is Valuable

Contains Complete History Of Calgary 46 Years Ago

Handled by countless work-hardened hands, yet carefully placed away so that the next visitor might find something with which to while away the long hours, an old publication of great interest to students of history has been found in a deserted cabin in the Caribou district, eight miles from Barkerville, and brought to Calgary by R. Forster.

How long the magazine lay in the cabin is unknown, but it was published in 1888 and probably was taken into the gold mining district in that year. It gives a complete picture of the Calgary of 46 years ago, mentioning business leaders who are still active in the affairs of the city.

It mentions the first cattle shipment to the United Kingdom in 1888. From this district 1,300 head were sent, but a portion of these were sold in Montreal.

That her begging brought in an average of \$6,000 a year has been confirmed by a woman beggar in Prague, Czechoslovakia.

Verdigris green is the latest color for women's wear in London.

Public Finance

Tendency Towards Lower Interest Rates On Bonds

The trend toward lower interest rates on Saskatchewan bonds is continuing.

Bond dealers are offering Regina bonds of 15-year maturity at 6 per cent, yield which compares favorably with much higher rates of the last two years.

D. Ross, Regina, city treasurer, in a report issued recently, points out these two features as being encouraging factors in public finance at the present time.

Prior to the depression, the report says, there was a tendency to divide Canadian municipal bonds into two categories of east and west, and to regard those of eastern Canada as the more reliable.

"The splendid showing of western cities through the depression, and the difficulties of certain eastern municipalities has had the effect of correcting the balance, and there is now a distinct tendency to rate cities for the purpose of credit on a more individual basis, taking into account the soundness of the community and the efficiency of management," says Mr. Ross.

Amazing New Method Of Blood Transfusion

Great Achievement In Surgical History Shows British Surgeon

An important surgical experiment was successfully demonstrated when two French surgeons, Professor Pauchet, of Paris University and Dr. Becart of Paris, carried out a new method of blood transfusion. Lord McNeill, the famous British surgeon, declared that the achievement was one of the most momentous in surgical history. An electrical appliance with two tubes was used. One tube takes blood from the donor and the other transmits it to the patient in such a way that the rhythm of the passing blood is maintained exactly as though it were passing in the ordinary way through the human system. The temperature of the blood is maintained and the condition of the blood as it passes into the arteries of the patient is precisely the same as when it leaves the donor. Furthermore, the appliance makes it impossible for the blood to clot a danger with which surgeons often have to contend in blood transfusion operations.

Closed First Century

Toronto Marks Hundred Years Of Existence With Impressive Service

In an impressive service of thanksgiving and prayer Toronto on March 5, closed its first century with a covenant of allegiance, fellowship and honor. The city opened its second century to the reverent strains of Stanford's To Dune and the victorious staccatos of Handel's Hallel Chorus.

His excellency the governor-general, Earl of Beaulieu, sat with Mayor W. J. Stewart and the city fathers were in the centre of the audience of 12,000 that attended the service.

Prime Minister R. B. Bennett and Rt. Hon. W. L. Mackenzie King, Dominion Liberal leader—the latter the grandson of William Lyon Mackenzie, Toronto's first mayor—sat in the boxes.

A flaming rocket, fired by the governor-general, Earl Beaulieu, shot at midnight from the shore of Lake Ontario and signalled the end of the first 100 years of the city's existence.

THE RHYMING OPTIMIST

By Aline Michaelis

INHERITANCE

One grandmother left me a ruby pin With a shawl from across the sea And a chest full of lace so fine and thin.

They are frail as man's charity.

And one grandmother left me a smiling mouth

And eyes that can see no wrong.

With a heart that is ardent and warm as the south

And a spirit attuned to song.

One grandmother left me a house on a hill

And a name which is old and proud;

The other one gave me a steadfast will

That can never be quelled or cowed.

They were dear old souls and I loved

Them as they were well.

In a dutiful grandchild's way;

But the stately house I may have to sell.

While the smile on my lips will stay.

May Buy Ex-Kaiser's Yacht

The University of Vienna is negotiating for the purchase of the ex-kaiser's yacht Meteor, from which William landed at Tangier in 1905 and nearly started a European war. After the kaiser's abdication the vessel was acquired by Great Britain.

There are 380,000,000 spinsters in the world—9,000,000 in Britain, 8,000,000 in France, 11,000,000 in the United States, and 16,000,000 in Germany.

Sixty below zero was registered at Verkhoyansk, Siberia, in January.

There are No Strings To This Seed Deal!

A N impression has been circulated that you can buy more and better Garden and Field Seeds for less money than you can from old established sources.

You positively cannot if you make your deal with me from a selection of over 1,000 varieties of the finest strains of Government Tested Seeds.

DON'T BUY ANOTHER PACKET, POUND, OR BUSHEL OF SEED TILL YOU HAVE SEEN ME.

Use any catalogue, advertisement or price list you please in making up your list of requirements. I guarantee to fill it at same prices for same quantities. In several cases you may find my prices less, in which case you have the benefit of the difference.

3c, 4c (and up), SUPER-size packets, but I'll sell you any quantity from 3 cent's worth to whatever will seed a section.

And in the bargain, I will hand you "MERCHANTS' NEW WAY COUPON" worth 25c in FREE Seeds.

This is an advertisement, but there is no advertisement equal to a delighted customer.

Let me secure your delight with the greatest Seed bargain and service you ever received.

Your Local Merchant

Little Helps For This Week

"The Lord taketh pleasure in His people. He will beautify the meek with salvation." Psalm 149:4.

Send down Thy likeness from above. And let this my adorning be: Clothe me with wisdom, patience, love, With lowliness and purity.

—Joachim Lange.

It is not in words explainable, with what divine light the exercise of goodness and charity will mould and glaze the hardest and coldest countenance, neither to what darkness their departure will consign the loveliest. For there is not a virtue the exercise of which, even momentarily, will not impress a new fairness on the features, neither on them only but on the whole body, the moral and intellectual faculties have operation, for all the movements and gestures however slight are different in their modes according to the mind that governs them, and on the gentleness and decision of right feeling follows grace of actions, and through continuance of this, grace of form.—J. Ruskin.

There is no beautifier of complexion or form or behavior like the will to scatter joy and not pain around us.—R. W. Emerson.

Pecan Nut Loaf

2 tablespoons Crown Brand Corn Syrup
1 cup milk
2 cups white sugar
1 teaspoon Mazola
2 cups pecan meats
Powdered sugar

Cook the syrup, sugar, Mazola and milk to the soft ball stage or 240 degrees on the thermometer. It is best to use a deep skillet or saucepan, as the mixture boils high. Add the stoned dates and stir until they are well mashed. Stir in the nuts, slightly more or less than the given quantity, remove from fire and beat until stiff. Place in wet napkin and roll in powdered sugar.

Display Early Printing

Page Of Famous Gutenberg Bible Shown In Montreal

A part of the most precious printing in the world, a page from the famous Gutenberg Bible, printed between the years 1450 and 1454 is on display in the McGill University Library, Montreal. It is printed in large Gothic characters, in Latin, double columns, with 40 lines to the column. In the same display is an example of the smallest bible in the world. It is attached, as the early Bibles were, to a lectern by a chain. There is also shown a chained Bible printed in Strasbourg in 1504.

An optimist is one who hops out of bed on a cold morning, saying: "Well, old bed, I'll be back to you in seventeen hours."

A pessimist is one who hops in bed, saying: "Shucks up again in seven hours!"

China's population now is estimated at about 414,011,000, and is the largest in the world, with that of India next, at 32,986,000, and Russia's third, at 147,000,000.

Man who was tossed twenty feet by a train, lived to tell the tale. However, you can't depend upon a train not tossing you any more than twenty feet.

Some Alaskan bears grow to weigh over 1,200 pounds.

Work For Peace

Canadians Should Continue To Advocate Disarmament

Canadians will continue to advocate disarmament "for we realize that war is a crime and should be treated as such," said Hon. R. J. Manion, minister of railways and canals, speaking at Ottawa recently. "Anything we can do to implement the Kellogg pact, that war be recognized and that disputes be settled peacefully, we should do. Until these terms are accepted, there is certainly a danger that our civilization will be annihilated."

Dr. Manion spoke under the auspices of the League of Nations Society and the Association of Canadian Clubs. Large armaments inevitably led to war, he said. He sketched the complex situation in Europe where "in an area half that of Canada, some 27 nations live side by side, with governmental systems, different languages and customs, puzzling minority problems, and with trade barriers and national frontiers dividing them."

Canada's New Flour Markets

Four new markets were gained by Canadian flour in 1933—France, Portugal, Salvador and Alaska. In 1933 Canadian flour was shipped to 70 external markets in all compared with 75 markets in 1932. The British Empire took 4,318,859 barrels of Canadian wheat flour in 1933 compared with 1,251,565 barrels taken by non-Empire countries.

An Old Landmark

Mount Royal's observatory, look-out and resting place for thousands of tourists at Montreal since it was built 27 years ago, is to be demolished. A new modern structure has already been erected nearby.

Almost 1,000 ships report their weather observations by radio every day.

Classed as "benets of burden," cows are exempt from the tithe taxes in England.

Held Up Traffic

Chicago Mule Kicks Glass Out Of Street Car

Sooky, a Chicago mule, is no respecter of big city traffic. Having planted itself squarely on the street car tracks, Sooky refused to budge and police were called.

"You push from behind and we'll turn our car sideways and shove this animal clear," said a policeman to the motorman. The result:

Sooky kicked out the glass of the street car, then the glass out of the headlights of the police automobile.

It took the combined efforts of neighborhood volunteers, and the police to pull Sooky away—some 30 minutes later—with a rope.

Now! Ease Sore Throat Instantly!

1 Crush and dissolve 3 Aspirin Tablets in half a glass of water.
2 GARGLE thoroughly—throw your head way back, allowing a little to trickle down your throat.
3 Repeat gargle and do not rinse mouth, allow gargle to remain on membranes of the throat for prolonged effect.

Remember Only Medicine Helps Sore Throat

Modern medical science now throws an entirely new light on sore throat. A way that cures the pain, relieves and irritates in as little as two or three minutes!

It requires medicine—like ASPIRIN—to do these things! That is why throat specialists throughout the world are prescribing this ASPIRIN gargle in place of old-time ways.

Be careful, however, that you get Aspirin Tablets for this purpose.

DIED

Brown—at Big Valley, on Wednesday, April 4th, 1934, Harriet Anne Brown (nee Walters), aged 82 years. The funeral will be held on Saturday, April 7th from the United Church, Lacombe.

SOLDIER SETTLERS' UNION

The regular meeting of the Soldier Settlers' Union was held in the Town Hall, Saturday, March 31, at 2:30 p.m. President W. Parker was in the chair. The hall was full, the attendance being made up of twenty members and about fifteen visitors. The members are sure on their feet and a discussion of over two hours took place. At the close of the meeting an invitation was extended to all ex-soldiers to attend the Vimy Dinner to be held in the Church Hall, Vimy Night, April 9th. This invitation was given by W. McNab, President of the local post of the Canadian Legion.

MAJOR DOUGLAS

With the British Columbia and Alberta legislature—as well as numerous citizens anxious to find a way out of the Slough of Despond—sitting at the feet of Major C. H. Douglas as he expounds his Social Credit Plan, a little about the Major himself may be of interest.
He is a Scot, a cousin of Lord Weir, a graduate of Cambridge university and a member of the Institutes of Mechanical and Electrical Engineering.

At one time he was head of the Westinghouse organization in India. While there he came into frequent contact and conversation with the Comptroller of India Currency. That started his mind grappling with financial and economic questions.

On the outbreak of the war, Major Douglas returned to England and was appointed assistant director of the Royal Aircraft Works at Farnborough. There he found it necessary to study cost accountancy very closely. One day he was struck with the fact that the total of wages and salaries paid out each week by the Royal Aircraft Works was not equal to the price of the goods produced. This condition he saw was common to all manufacturing establishments.

Consequently, he reasoned, it must be a fact that the total amount of purchasing power distributed by British industry as a whole was not sufficient to cover any given period to purchase the products created during that period.

That is the basic postulate of the Douglas philosophy—that industry generates values more rapidly than it distributes purchasing power, and that industry is the sole source of purchasing power. His "plan" of issuing redeemable social credit to span the gap between the volume of value created and the lesser volume of purchasing power, so that production, issuance of social credit, consumption, retirement of social credit, keep on in continuous circulation just as the blood keeps on circulating and recirculating through the human body, has attracted numbers of recognized writers and students of economics.

BOXING TOURNAMENT AT PONOKA

A big boxing tournament which should interest fight fans of Central Alberta is being staged at the Elk's Hall, Ponoka, on Wednesday, April 18th. There will be 6 good bouts, and all fighters are well known to the people of the Alberta. The fight is being promoted by Pete Hoin who promises a real flite treat. Mr. Jim Toller, will act as manager of the tournament, and he needs no introduction to fans. Keep the date in mind and arrange to be there. Watch for the posters.

REFUNDS MONEY

High River, April 5—Last summer a transient unemployed man was treated to a 'free meal on the town'. Now living in Manitoba and apparently in better circumstances, he has sent back the 40 cents to pay for the meal.

The dance held in the Odd Fellow's hall Thursday night was well attended by the young people of the town.

Dr. and Mrs. Hynes and Miss Margaret Masters left today on an extended trip to Eastern Canada and Europe. They will motor to Montreal and will leave from there for Vienna. They expect to be away three months.

Many people in town and district took advantage of the lower car license rates and many licenses were purchased since the 1st of the month.

Remember the Vinay Dinner on Monday, April 9th in the Church Hall. A large attendance is anticipated. Special speaker for the evening will be Capt. Robt. Pearson.

With ticket No. 35, Gus Macdonald won the 14 lb. Fruit Cake donated by Miss Inskip, to St. Cyprian's Sale last Saturday. Being a bachelor, this excellent confection should be enjoyed.

The regular meeting of the W.I. will be held at the home of Mrs. J. Ford. Roll Call will be answered by gardening hints. Education: Mrs. Ray Saunders. Hostesses: Mrs. Jenkins, Mrs. Mutch, Mrs. Millard and Mrs. Anderson.

OVERCOAT LOST

Between Lacombe and Ponoka. Black winter coat. Reward for return to this office.

OGDEN'S—All well that Smokes Well

Wheat Control Legislation

With the introduction of legislation in the House of Commons at Ottawa, and simultaneously in the legislatures of the three prairie provinces, whereby power is to be taken by the several governments to control the marketing of wheat, a complete reversal in the policy which has hitherto been one of the outstanding features of Canada's development will become effective. Time alone will reveal whether the policy now being adopted is wise or not, but unquestionably the several governments concerned are convinced that it is a necessary step to take at this particular period in our national and economic history.

From the earliest days of the opening of Western Canada to settlement, and following the construction of our first transcontinental railway, it has been the aim of all governments at Ottawa not only to encourage settlement, but through the provision of all necessary services to promote the production of the greatest possible volume of wheat. In the development of these policies the Federal government has been assisted and its efforts supplemented by the Provincial governments in the West. Production was encouraged in all possible ways and by every practical means. A never ceasing battle against weeds, insect pests, rust, losses from hail, has been waged, new varieties of early ripening grain have been developed in order to increase the capacity of wheat production; the use of good clean seed has been stressed; the credit of the Dominion and the provinces has been utilized to make Western Canada a great wheat producing country.

Under the legislation now before parliament and the legislatures, governments are to take control of wheat sales and marketing in order to restrict the volume of such sales, and to apportion among the farmers the amount each will be permitted to sell in the coming crop year, while the Federal authorities will control the volume of sales and deliveries outside the provinces.

"Control of Marketing of Wheat Act" of a uniform character submitted to the legislatures of Manitoba, Saskatchewan and Alberta provide for control by license or otherwise of the quantity of wheat which each owner or occupant of land may sell during the crop year 1934-35. This legislation also provides that any wheat sold in the provinces shall be sold and delivered in accordance with the regulations made by the Provincial Boards; allows an interprovincial board to take possession and sell wheat stored anywhere in the province; provides power to enter into contracts or agreements of any kind with respect to the purchase, sale, handling, transportation, storage and insurance of wheat and to determine what constitutes delivery or possession.

In a word, the provinces take absolute control over the marketing, purchase and sale, and the handling and transportation of all wheat within their respective provinces, while the Dominion takes control of the sale and deliveries of wheat outside the provinces whether within Canada or to other countries.

This, in substance, is the manner in which it is proposed to implement Canada's undertaking in the International Wheat Agreement negotiated at London last year, rather than to attempt to enforce a definite per centage reduction in the acreage sown to wheat and which might, or might not, depending upon climatic and other conditions, result in a lower crop production.

Unquestionably the administration of this new legislation will be difficult. It will call for great tact and discrimination if almost universal criticism of and opposition to it is not to develop. Consideration must be given to those thousands of wheat farmers in the drought-stricken areas of the West who have not enjoyed normal crops for several years and many of whom have had no crops at all. If crop conditions are favorable this season they must be allowed full opportunity to rehabilitate themselves. The needs of a farmer with a large family of young children are necessarily greater than those of a farmer having no family, or whose children are now of adult age and can care for themselves. In fact, a hundred and one varying circumstances will arise demanding consideration. Hence, the need of issuing individual licenses fixing the quantity of wheat which each farmer may sell is a task in itself.

The new legislation is to be effective for one year only, although, of course, it may come up for review prior to its expiration. In view of present world conditions this restrictive legislation may be necessary; governments at all event appear to be convinced that it is necessary. Therefore, despite the many conflicting views which prevail, it would appear to be best that people generally should not only agree to give it a fair trial, but that they should do what lies in their power to make the proposed system operate as efficiently and with as little friction as possible. Let us see what it can accomplish for our farmer producers in the crop year 1934-35.

Saved Many Ships

Woman Was Harbormaster in Wales For 75 Years

On the eve of her hundredth birthday, Mrs. Jane Ellen Jones, harbormaster at Porthludlow, Wales, for 75 years, has died. She lived in an inn, 300 years old, whose front door was washed by high tide, and there at one time she conducted a girls' school, teaching art, needlework, domestic science and so on. She also served as a lighthouse for she put lamps in the windows as a guide to ships. It is asserted in Wales that in this way Mrs. Jones saved many vessels from disaster.

"Mother," called Tommie from the bathroom, "do my ears belong to my face or my neck?"
"Why do you ask that?" queried his mother.
"Well, you said to wash my neck, and I just wanted to know where to stop," answered the lad.

"Whales are the business men of the marine world," states a writer. The whale that swallowed Jonah certainly believed in a small prophet and a quick return.

London's first aviation concert was given recently when a dance band played in a searing aeroplane equipped with loud speakers.

Smothering Sensations Faint and Dizzy Spells

These feelings of faintness, those dizzy spells, those smothering, choking sensations which come over people from time to time are warnings that should not go unheeded. They indicate an unusual condition of the nerves and other vital organs, and should be given immediate attention. Those suffering in this way will find relief in Milburn's Health Nerve Pills. These pills are a remedy with which to reorganize their health, build up their run down system, and bring back their bodily vigor.

A Real Self-Starter

Invention Uses Radiations From Human Body To Complete Electric Circuit

Suppose that on awakening each morning and as you still lie in bed trying to decide to get up, you could start the coffee to percolating merely by thinking of it. Of course, if you had an electric coffee pot at your bedside, you could switch on the current. But Major Raymond Phillips claims that he can even do that without touching the apparatus at all, by means of his new invention, the "radio psychomotor." This invention, the major says, enables him to do things which would not so long ago have been ascribed to super-natural agencies. By merely putting his hand over a man in normal health will send out sufficient energy to ring motion, or switch on electricity to light a kettle. The theory, as explained in London Answers, is that the radiations from the body of a person who is physically fit are sufficient to complete an electric circuit, and so make electrical apparatus work. The psychomotor catches these radiations and concentrates them. "Thought plays an important part in the process," Major Phillips says. "By concentrating on 'willing' an electric bell to ring a more rapid response is obtained than when the hands are placed over the psychomotor mechanically. It will run for longer periods more quickly if the person who is 'working' the psychomotor has his whole mind on what he is doing. If the essence of everything is electrical and if we ourselves are, in a sense, we possess batteries, then we can understand ourselves and the world better, we may be able to do all sorts of wonderful things by merely thinking or willing them."

The Greatest Invention

Modern Progress Made Possible By Invention Of "Nothing"

The invention of "nothing" was the greatest invention of our present era. Without this invention the progress of modern science, industry and commerce would have been impossible. By "nothing" we mean the zero or cipher, the arithmetic notation. The story of this intensely important symbol is only one of a number of fascinating tales told by Dr. Tobias Dantzig in "Number, the Language of Science," a revised edition of which has just been issued. In the field of arithmetic there are, of course, many other important symbols. The story of the "nothing" is only one of a number of fascinating tales told by Dr. Tobias Dantzig in "Number, the Language of Science," a revised edition of which has just been issued. In the field of arithmetic there are, of course, many other important symbols. The story of the "nothing" is only one of a number of fascinating tales told by Dr. Tobias Dantzig in "Number, the Language of Science," a revised edition of which has just been issued.

Little Excitement Over New Airplane Designs

People Are More Concerned Over Changes In Cars
It is a queer fact, if you ever stop to think of it, that radical changes in the methods of automobiles should cause so much talk when so little popular excitement has been caused by the far more striking developments in the design of airplanes since the days of the Wrights at Kittyhawk. Despite the enormous increase in the number of air travelers, we may regard this as clear evidence that the great majority of us are still earth-borne mortals. — Providence Journal.

A woman of frugal mind went to the village store and bought a mousetrap. Early in the evening she returned with the trap in her hand and said: "I wonder if you'd exchange this for something else in the shop. We've caught the mouse."

The United States produces 43 per cent. of the world output of coal.

This Wall Of Gas

Very Narrow Margin Protects Humans From Sun's "Death Rays"

An eighth of an inch of gas is all that stands between the human race and destruction by "death rays" from the sun, according to Dr. Charles G. Abbot in his annual report to the Smithsonian Institution. This ozone "wall" lies forty miles above the earth in the upper reaches of the stratosphere and is spread over considerable space. If it were concentrated it would be less than one-eighth of an inch thick. The ozone absorbs short-wave ultraviolet rays that would blind, blister, and eventually destroy all earthly life if they could penetrate the "wall." Death of Earth Abbot. The ultraviolet waves known to us as beneficial to health are of a longer wavelength. If the ozone layer were 1/4 inch thick the beneficial rays could not get through either ultraviolet or the longer wave rays. The Smithsonian Institution calculates that the heat generated by the sun is equal to that which would be produced by burning 400,000,000,000,000,000 tons of anthracite coal a year.

Russia's Air Service

Society For Promotion Of Aviation Has Twelve Million Members

The rapid strides which Russia has made in the evolution of its air-plane service has astounded the whole world. The next war will be fought in the air and Russia is preparing for all eventualities, whether on the offensive or defensive. Russia is becoming air-minded, airplanes are being universally used, the Gosvokhimi Society for the promotion of aviation having a membership of 12,000,000. The culture and the spirit of the air, exchange their knowledge and practical experiences, collect large sums of money to present airplanes to the State, and now a giant 120 passenger airplane is being built by public subscription, this is the foremost of a large air passenger traffic within as well as without Russia.

The new state of the nations total air strength are: France 3,000 war planes; Russia 2,900; United States, 2,820; Japan 2,200; Italy 1,507; Britain, 1,400.

Russia is second in the race. What is the British Empire doing? — Quebec Chronicle-Telegraph.

Zulus Entertain Prince

Warrior Chiefs Pay Homage At Special Arranged War Dance

Stalwart warriors of the great Zulu nation paid homage to Prince George at a specially-arranged war dance, one of the highlights of the South African tour of the king's fourth son.

In full regalia, they assembled from all parts of Natal and Zululand. Betting the occasion, the prince and his staff wore full-dress uniforms when they received the principal Zulu chiefs.

Some chiefs wore the latest fashions in European suits, others were clad in leopard skin and fantastic headgear. They held gifts of war shields, assegais and pottery work at the prince's feet. The prince in turn presented them with walking sticks, highly prized by native chiefs.

Travels On Rails Or Road

The "route-rail" is the latest thing on the French roads. It is hybrid which, by means of wheels fitted with pneumatic tyres and also possessing flanges, can travel either on rails or on the road. This new vehicle travels daily from Paris to Lille and back, using both rail and road on the way.

In moving Captain Cook's cottage from Great Ayton, England, to Melbourne, Australia, even the ivy of the walls is being taken to be replanted.

The North American continent is becoming very slightly warmer each decade.

Recipes For This Week

(By Betty Barclay)

CRUSTY FRUIT TRIANGLES

2 cups sifted cake flour
2 teaspoons double action baking powder
1/2 teaspoon salt
2 tablespoons sugar
1/2 cup butter or other shortening
1 1/2 teaspoons ground orange rind
1/2 cup seedless raisins
1/2 cup milk.
Sift flour once, measure, add baking powder, salt, and sugar, and sift again. Cut in shortening; add orange rind and raisins. Add milk all at once and stir carefully until all flour is dampened. Then stir vigorously until mixture forms a soft dough and follows spoon around bowl. Turn out immediately on slightly floured board and knead 30 seconds. Roll 1/4 inch thick and cut in triangles. Place on ungreased baking sheet. Brush tops lightly with mixture of equal parts of sugar and milk. Bake in hot oven (450 degrees F.) 12 to 15 minutes, or until browned. Makes about 15 scones.

BERKSHIRE PUDDING

3 squares unswirled chocolate
3 cups milk
1/2 cup sugar
6 tablespoons flour
1/2 teaspoon salt
1 teaspoon vanilla.
Add chocolate to milk and heat in double boiler. When chocolate is melted, beat with rotary egg beater until blended. Combine sugar, flour, and salt, add gradually to chocolate mixture and cook until thickened, stirring constantly; then continue cooking 10 minutes, stirring occasionally. Add vanilla. Chill and serve with cream. Serves 6.

New Motto For Legion

Legacy From Former Corps Commander, Sir Arthur Currie

Turning it a legacy to the organization from the former corps commander, Sir Arthur Currie, the Dominion executive council of the Canadian Legion, at its opening session at Ottawa, adopted as its motto seven words from the last message of Sir Arthur, one which he prepared for the Remembrance Day observance in Toronto last November. The Legion's new motto, which will appear on all official stationery, and will also be used on memorial occasions, is "They served till death; they were not."

Spain expects a larger orange crop than last year.

Agricultural Notes

Many Items Of Interest To The Western Farmer

Maize, or Indian corn, a native of the American continent, was grown in China under the name of Imperial grain long before the first white settlers arrived in North America.

Practically all of last year's production of timothy and brome grass seed and most of the alfalfa and sweet clover has been sold by growers in Manitoba.

The total area of Scotland, excluding inland waters, is 10,070,000 acres, of which about one fourth is under crops and permanent grass; the remainder is rough grazing (mountain heathland); and one fourth, deer forests and towns.

According to the Dominion Seed Branch markets service, red clover and timothy seed growers in Quebec were having a good demand in mid-February, but the badly drifted condition of the roads was delaying the movement.

The More Beautiful Canada Campaign Committee of the Canadian Horticultural Committee has been asked to urge the various highways departments of the Dominion to establish a definite policy within their scope in the beautification and adornment of Canada.

Only a small part of the 1933 seed production of clover and grass remains to be sold by growers in southwestern Ontario. In the Rainy River and Kenora districts of north-western Ontario, most of the red clover and timothy seed grown in these districts will be sold by the growers in the past month.

The production of wool in the Argentine in the current season (1st October, 1933 to 30th September, 1934) is provisionally estimated at 368,000,000 lbs. (greasy basis). This represents an increase of about 10,000,000 lbs. over last season and an advance of 23,000,000 lbs. on the average of the period 1923-1931-32.

It is illegal in French Morocco, after the manner in Canada, for anyone to import, transport for purposes of marketing, to hold for sale, or to sell, or dispose of under the designation of seed wheat, any wheat containing at the time of consignment more than one per cent. of total impurities, or more than two per cent. broken grain.

In the estimates of the total value of all descriptions of farm poultry by provinces in Canada in 1933, Ontario topped the list with \$4,577,000 followed by Quebec \$5,054,000; Saskatchewan \$4,154,000; Alberta, \$3,080,000; Manitoba \$2,383,000; British Columbia \$1,927,000; New Brunswick \$894,000; Nova Scotia \$738,000; and P.E.I. \$609,000.

A study of the Rowett Research Institute, Scotland, to determine whether extra protein feed to sheep would be partially utilized as such for the production of extra wool showed there was no significant difference in any of the characters of the wool measured in two groups of sheep. One group was fed 52 per cent. more digestible protein than the other.

Unique Quit Claim Deed

Girl Legally Renounces Fiance When He Preferred Her Sister

There is in Sydney a unique record in marital affairs. It is a quit claim deed, a man's affidavit to show that he is legally divorced from his wife, and is duly entered into with legal formalities.

It seems that a young blood of Sydney was paying attention to a young lady and after paying court to her decided that he preferred her sister to the girl he was courting. The record forms part of those of St. George's Anglican church in Sydney, which was built around 1785 as a garrison church and contains a genuine Chippendale chair which came from Nelson's cabin when his ship visited there with a fleet about 1800 when chasing the French admiral Villeneuve.

Further evidence of a changing world is provided by the news that in Scotland the French Percheron horse is replacing the Clydesdale and that he is being imported from Alberta. The horse business could not be in a more twisted condition than indicated by this procedure, says the Toronto Globe.

Stream-Lining came too late to be

really intriguing. Imagine a streamlined horse and buggy.

Immense Mineral Wealth Is Revealed By Development Work In The North-West Territories

Owing to the evidence that there will be greatly increased activity in the Great Bear Lake mining field in 1934, Hon. Thomas G. Murphy, Minister of the Interior, has directed that the Sub-mining Recorder's office at Cameron Bay be raised to the status of a Mining Recorder's office and that all the records relating to the Great Bear Lake field be transferred from Fort Smith to Cameron Bay as soon as possible. The general increase in mining and prospecting activity will be greatly accelerated this year because of the expiration of the moratorium on representation work, and the change at Cameron Bay is to facilitate all lines of activity by having the records immediately available to miners and prospectors in the centre of the field, instead of necessitating a trip to Fort Smith.

That the mining properties in the Northwest Territories are developing in the knowledge of the reports received by Hon. Mr. Murphy, from officers in the field during the year 1933, with the trend of operations in the past season chiefly in the development of present holdings toward a production basis. Great Bear Lake is still by far the most important mining field in the Northwest Territories and development during 1933, while not spectacular was of great significance as it practically proved that several promising properties have every indication of becoming important producers in 1934 and 1935.

The principal companies have carried out extensive trenching and diamond drilling with very satisfactory results and in a number of cases shipments of ore and concentrates have been made to reduction plants in British Columbia and Ontario. Following in the wake of this development activity, other improvements have been noted, such as cheaper and better transportation facilities both by air and water, improved radio communication, extension of surveys, location of a department of a Royal Canadian Mounted Police detachment in the centre of activity at Cameron Bay, and the erection of three sawmills and the opening of several stores. The addition of a number of equipment to improve transportation facilities on Great Bear Lake is under consideration for the coming season by one of the leading transport companies.

The various government departments have been active in assisting industry in the development of the Great Bear Lake mining area. The department of the Interior is charged with the administration of the Northwest Territories and consequently has played a leading role in this work. Maps of the country lying south and east of Great Bear Lake are in course of preparation in the Topographical and Air Survey Bureau of the department, based on aerial surveys carried out in co-operation with the Royal Canadian Air Force. These maps will be of great assistance in the development of this very promising district.

Last year the Department of the Interior also had a townsite laid out at Cameron Bay and to date over 100 lots have been applied for and numerous buildings erected. A survey also made by the department's mining inspector of the timber resources adjoining Great Bear Lake with a view to their orderly utilization.

Other departments are active in this area. The Department of Public Works is improving conditions of water transportation at several points; the Department of Justice has established a Royal Canadian Mounted Police detachment at Cameron Bay; and an up-to-date wireless station has been installed at the same point by the Department of National Defence.

The search for gold was actively pressed by prospectors in many parts of the Northwest Territories during the past year and unconfirmed reports indicate that several discoveries of placer gold were made in the South Nahanni country. Last fall two prospectors returning from the South Nahanni area which lies in the southwestern part of the Territories and close to the territorial boundary between the Yukon and the Northwest Territories, reported that they had washed some rich gravel on McLeod creek and obtained a fair quantity of coarse gold. Although officials of the Department of the Interior were unable to confirm this report by personal interview, the news spread rapidly and a small rush resulted. By the end of December there were approximately 100 placer claims staked.

The original discoveries were on McLeod creek and two other small feeder creeks, the Diamond and the Canyon. It is also reported that claims have been staked on creeks running into flat and prairie rivers, which together with the McLeod are tributaries of the South Nahanni river. Several prospecting parties have been down into the area while

a number of others proceeded by dog-team from Simpson on the Mackenzie river. In August last another coal lease was granted on the southwest shore of McVicar Arm, Great Bear Lake, where the main outcrop consists of a seam of black lignite over eight feet in thickness. The Northwest Company, subsidiary of Imperial Oil Limited, operated its wells on the Mackenzie river 53 miles below Norman and produced over 4,500 barrels of petroleum and gasoline, of which about 90 per cent was shipped to Great Bear Lake.

Development work, which was carried on by the twenty most active companies in the district, continued to show the immense mineral wealth of this field. Several of the earliest claims staked have reached the production stage and notwithstanding the great attention which development work received during the past year over fifty tons of pitchblende and native silver were shipped out to reduction plants at Trail, British Columbia, and Fort Hope, Ontario. One company has already been shipping for treatment, since 1931, high grade radium and silver ore and in December, 1933, transported by plane the first high grade radium concentrate obtained from its fifty-ton mill. Shipments of concentrates from radium and silver ore will be increased as soon as water transport becomes available. It is estimated that it is hardly four years since the first discoveries of radium-bearing ore at Great Bear Lake, Canada has already become an important producer of this valuable element and as production increases the Great Bear Lake area will be the source of ore from which the whole of Canada and the British Empire can be supplied with radium.

While the discovery and development of the deposits of radium-bearing ore at Great Bear Lake has occupied public attention, silver is the predominant precious metal found in this field. Numerous veins containing high grade silver have been located on several large properties and development of these holdings has proved that several of them will be producers and shippers during 1934.

Hundreds of men were employed on the various claims undergoing exploration and development, and the mining equipment is being raised to a very high standard. One mill has been handling over 10 tons of ore daily since early in December while a ten-ton pilot mill which was erected last year is being replaced this year by a twenty-five-ton mill. Plans have been prepared for a fifty-ton mill to be erected on another property this summer.

Work already accomplished on the different properties and plans under way indicate that 1934 will be one of the most important years in the development of the Great Bear Lake mining area. In other parts of the Northwest Territories, exploration and prospecting work will continue to be carried on in the hope of further adding to the known mineral wealth of the Dominion.

Meat Curing Materials

Meat Can Be Successfully Cured By Use Of Salt Alone

The principle ingredients of all mixtures for curing meats is salt, says the Dominion Department of Agriculture. Meats can be successfully cured with salt alone but without it. Salt alone constitutes a part of most mixtures for curing meats. The specific effects of salt are to extract the blood quickly; to impart a bright red color to the lean meat; to give firmness to the meat, and to neutralize unpleasant flavours. A too liberal allowance of salt makes the meat dry and hard. Sugar, particularly when applied in conjunction with heat, has strong preservative powers; when applied cold, it is used to secure a desired flavour. Pepper is used by many in curing meats, but it is employed more to secure a particular flavour than for its preserving properties. Smoke has preserving properties, but like sugar and pepper it is employed chiefly to secure a desired flavour.

Adaptable Blacksmiths

Manitoba blacksmiths, in Winnipeg, for their annual convention, declared the village smithy standing under the spreading chestnut tree is only a dim figure now. Horse-shoeing is just a sideline and blacksmiths have become jacks of all trades, firmly entrenched in the oxy-acetylene welding business.

"The people of this country must grow more wheat," declared the candidate.

"How about hay?" shouted a heckler.

Hunter's Wife—Where is what you shot? In the kitchen?

Hunter—No, in the hospital.

South Africa may reduce its tax on excess profits of gold mines.

Tuberculosis On Wane

Survey In Saskatoon Schools Gives Encouraging Results

Tuberculosis is on the wane in Saskatoon schools. A recent survey in two representative schools of the city elicited the information that only 14.08 per cent showed positive reactions to tuberculin tests as compared with 53.5 per cent. In 1921 in the same schools. None of the cases was active.

The report of the survey has been issued by Dr. Griffith Binning, director of medical services in Saskatoon schools. Saskatoon, Dr. Binning pointed out, had been for a number of years centre of a tuberculosis free cattle area, while milk pasteurization and meat inspection were required by city bylaws. He felt these factors contributed in a large measure to the small amount of tuberculosis among school children.

Last month 845 children were examined. Half of these children were Saskatoon born and reared and of that half, only a small proportion reacted positively to the tuberculin tests.

No Job For Women

Only Men Should Pilot Commercial Planes Says Woman Aviator

Antonie Straasman, one of the first German woman flyers, who arrived in New York recently, admits ruefully that women must confine themselves to the field of amateur aviation.

"The day of experimental flying is past," she said. "It is time for women to admit that commercial aviation is a man's job. Passengers have more confidence in male pilots. Women are not found at the controls of locomotives and they should not seek to pilot the great commercial planes."

Miss Straasman has taken out her first naturalization papers and hopes to live in New York. She will continue to fly, but only for her own amusement.

Pure Food Guarantee

Canadian Products Hold Envious Place In Markets Of Great Britain

For years Canadian meat products have held an enviable place in the markets of Great Britain, in the other countries of Europe, and, indeed, in all countries of the world. In order to maintain these Canadian high standards, the Dominion government established an inspection service, mainly through the Department of Agriculture, consisting of a staff of veterinary inspectors specially trained for the purpose of inspecting and grading live stock and packing-house products. The government stamp "Canada Approved" is the guarantee of pure food.

Sale Of Squirrel Pelts

400,000 Skins Valued At \$50,000 Marketed In Edmonton District

Sales of upwards of 400,000 pelts of common red squirrels, marketed through Edmonton in the winter fur season now closing, have resulted in the distribution of approximately \$50,000 to thousands of farmers, farm boys and girls beside trappers, it is estimated by fur dealers at Edmonton.

Prices paid have ranged from eight to 15 cents when the demand reached its height but the market is now quiet at 10 to 12 cents and many pelts being rejected as "spring" since milder weather and sunny days have had their effect.

"I'm talking about food for mankind just now," said the candidate, "but I'll get around to your case in a minute!"

The longest aqueduct in the world is the Pugliese. It is 1,175 miles long and serves 636 Italian towns.

DEFIED A KING FOR LOVE

All the king's horses and all the king's men couldn't make young Prince Sigvard of Sweden change his mind about wanting to marry Frauslen Erika Patzek, German film actress, with whom he is shown in London. The Prince flatly refused the plea of King Gustav of Sweden, his uncle, that he reconsider the matter.

By Ruth Rogers

615

IT'S SPRINGTIME FOR YOUNGER FASHIONABLES AS WELL AS FOR MUMMIES

Pattern includes dress—Rabbit. Today's little dress is carried out in an old-fashioned calico printed dimity.

The plaits of the skirt are arranged to form a box-pleat effect and away so prettily in motion.

Style No. 615 also includes pattern for the pet rabbit. Designed for sizes 4, 6, 8 and 10 years.

Size 8 requires 1½ yards of 38-inch material with 1½ yards of lining; rabbit requires ¾ yard of 35-inch material.

Striped or plaided cotton is an other very smart choice. Linen and challis prints are most favored and quite suitable for this easily made dress.

Price of pattern 20 cents in stamps or coin (note is preferred). Wrap coin carefully.

Gardening

Instructions For Preparing The Hot Bed For Steady Growth Early

Among the best flowering shrubs recommended for the garden are: (Hardy types) Spiraea, Russian Pea Shrub and Caragana—(less hardy) Forsythia, Japanese Rose, Mock Orange, Hydrangea, Lilac, Honeysuckle and Weigela.

Among small flowering trees are: European Mountain Ash, Double Flowered Crab, Yellow Wood, Catalpa and Japanese Tree Lilac. Many shrubs should be pruned in late winter and early spring. As a general rule the object is to remove all dead branches, as well as any growth that is interfering or unwanted. As raspberries only produce fruit on the canes grown during the previous season, all two-year-old shoots should be taken out sometime between the time of fruit picking and the next spring. In addition it is well to go over the patch in late spring and cut back any shoots which the frost has killed. To prevent excessive "bleeding" grapevines must be pruned before the sap starts coming up in early spring. Fruit is borne on the new wood each year, so remove all but a mere framework of the older growth. With fruit trees the special objects of pruning are to let in light, and develop a wide circumference of outside growth. Late blooming shrubs and practically all of the hardy roses are also pruned in early spring. With the former weak, older growth should be removed and any ungainly shoots which mar the general effect. As rose bloom comes on the new wood, the old growth should be cut back very severely.

Many people regard this starting of seed indoors as a mussy and unsatisfactory business, but it need not be so. The best arrangement is a hot bed, though where only a few plants of each variety are required a shallow box in a sunny window will be sufficient. A hot bed simply consists of some old window, laid on a wooden framework about 18 inches high, with two inches of fine garden soil on top of the framework.

The market for Canadian furniture is chiefly domestic for only \$128,072 worth of Canadian-made furniture of wood was exported during the year. The imports of furniture of wood and other material amounted to \$417,558 during the same year.

eron, Supt.
Senior B.Y.P.U. Monday at 8
p.m.

HARD TIME DANCE

IN LINCOLN HALL
Don't forget the Hard Time dance
to be held in Lincoln Hall on Friday,
April 13th. Come and have a good
time. Good music.

For every Farmer using an effi-
cient cream separator there are at
least ten who are using the rattle
box kind. These are the kind that
make a noise, but that's all. A noise
can't be churned or sold as butterfat.
You can go anywhere out in the
country and find separators wasting
enough cream to pay the interest on
the National Debt. Come in and see
the new DeLaval 3,000,000 Golden
Series separator, the World's clean-
est skimming and easiest running
separator on the market. Morrison
and Johnston, Ltd.

A public meeting on the Douglas
System of Economics under the aus-
pices of the Lacombe Social Credit
Group will be held in the United
Church Hall on Wednesday, April 18,
at 8 p.m. R. E. Ansley, Vice-Pres.,
Red Deer Social Credit Group will be
the speaker with His Worship Mayor
Edwin H. Jones, K.C., in the chair.
Everybody welcome and a question
period will be provided.

Remember the dates, April 14th to
April 20th. The two for one sale of
Miracle Varnish, Varnish Stain, and
Enamel, and Easycoat at Morrison
and Johnston, Ltd.

FOR SALE

Timothy seed for sale; Govt. test
99 per cent. Just 700 lbs. A. C.
Wolfe, Lacombe, Alta.

Your grocer says:

Keep going with **PEP**

★ Nourishing toasted Wheat

★ With extra Bran added

★ Ready-to-eat with milk or cream

Kellogg's PEP is for active people. For youngsters who are always on
the go. For grown-ups who use and need energy. Because PEP is full
of the nourishment of wheat. The protein. The vitamin B. PEP digests
easily and releases energy quickly. There's extra bran in PEP. Enough
to be mildly laxative.

This week your grocer says, *Keep going with PEP!* You'll find
PEP featured at your grocer's. Discover the popularity of this ready-
to-eat cereal in your family. Fresh, crisp flakes of toasted wheat. Loaded
with flavor. Delicious with milk or cream. Sliced fruit
or honey adds wonderful variety.

Get PEP from your grocer. Always fresh. Heat-sealed
in the WAXTITE bag—an exclusive Kellogg feature.
Made by Kellogg Company, Ltd., London, Ontario.
